## PROFESSIONAL SUMMARY

I am a skilled software developer with over 2 years of professional experience in creating modern, high-quality web applications. My expertise spans both frontend and backend development, allowing me to craft quality, scalable and impactful solutions that bring value to users and businesses alike. Passionate about innovation and problem-solving, I thrive in dynamic environments where I can contribute to impactful projects and drive results.

## EXPERIENCE

### Belit | Full-stack engineer | Aug 2024 - Present
- Designed and developed a robust Document Management System (DMS) using ASP.NET Core API and React, enabling secure storage and organization of documents in electronic format.
- Executed the entire DMS project independently, reducing document retrieval time by 60%.
- Worked with CEO to gather project requirements and ensure the application met their needs.
- Utilized GitLab for version control and organized development stages systematically.

### Blackbird | Full-stack engineer | May 2023 - Jul 2024
- Developed modern web applications using React and Next.js, focusing on creating high-quality and functional user interfaces.
- Collaborated closely with the backend team to integrate ASP.NET APIs and contributed in developing APIs, ensuring stable communication between the frontend and backend systems.
- Developed the company website (https://blackbird.rs/), managing all aspects of its development.
- Contributed to the development of the Prostore app (https://prostor.rs/), an application for renting spaces, by delivering efficient and user-focused solutions.
- Worked closely with the design team to implement visually appealing and user-centric interfaces, ensuring alignment between design concepts and application functionality.

### Synsoft LTD. | Front-end engineer | May 2022 - Sep 2022
- Developed web applications using Angular, focusing on creating functional user-friendly interface.
- Worked on the backend using the Spring Framework, connecting the application to the server and implementing core business logic.
- Gained hands-on experience in both frontend and backend development, enhancing understanding of the full application development process.
- Delivered a high-quality dispatcher application for the electro industry in Serbia

### Microsoft | Map labeling | Jun 2020 - Aug 2020
- Input relevant map objects using JOSM maps to support the training of artificial intelligence models, improving their ability to recognize objects and understand spatial structures.
- Coordinated with team members to align labeling efforts with project requirements and objectives.

## LANGUAGES & SKILS:

React   Next.js   JavaScript   TypeScript   ASP.NET
SpringBoot   Java   C#   Python   Angular   TailwindCSS   Sass
Git   Bootstrap   Firebase   Postman   English (Fluent)   Italian (Entry)

## EDUCATION

- Univerzitet Metropolitan Computer Software Engineering | 2018 - 2022
